

# LICENSE PLATE RECOGNITION (LPR)

Early Warning Crime Prevention

## HOW DOES IT WORK?

The cameras read the license plates and check them against the hot list databases.

If a plate is listed, an alert is immediately sent to Verifier for visual Verification.

If positively verified, the necessary alerts are immediately sent to SAPS and your local Security Service Providers who are contacted and dispatched.

## WHO INSTALLS THE CAMERAS AND SOFTWARE?

- Verifier refers approved installation companies in order to ensure the desired results.
- A nominal license fee per LPR camera can be included in our monitoring fee.
- Your required internet breakout capacity is dependent on the number of LPR Lanes.

## WHY USE VERIFIER LPR?

- We are the **Leaders** in the field - results and satisfied clients.
- Our system talks to **hot list** databases in real – time.
- We provide a preventative **early warning** service.
- Verifier is an **independent** monitoring service.
- We have **strong links** with the Authorities and Community structures.
- Our centralized specialist service is **cost effective**.
- **Clean data** is maintained and shared by all of our clients and SAPS.
- Alerts are verified and acted on in a uniform, SAPS approved manner ensuring **risk mitigation**.
- We push your local Security Service Provider to **perform**.
- We further mitigate the risk of site security **collusion** with organized crime syndicates.
- We arrange **training** for your Security Management.

## WHAT DO OUR CLIENTS SAY?

“ For the last four years we at Constantia Village Shopping Centre have benefited from a Verifier monitored, proactive LPR system, which provides our Security team with “heads up” information as suspect/wanted vehicles enter our parking area. This has assisted in the prevention of numerous potential incidents, and has facilitated the arrests of suspects wanted on current or outstanding cases – all leading to a general reduction in criminal activity both in and around our Centre. ”

**DEIDRE PAUL**

“ Verifiers LPR solution has proven effective in assisting to combat crime in our precinct, whilst freeing up our local security staff to focus on security management tasks. It is a cost effective method of producing early warning verified LPR alerts – essential to high traffic precincts like ours. ”

**GORDON RALPH**
