

# Why Choose Verifier?

Independence, Passion, Protection.

**Tried and Tested  
Real Peace of Mind**

# Tried and Tested. Real Peace of Mind.

## -Verifier's Pillars-

### Independence

Our independence from installers, suppliers and armed response/guarding companies means that Verifier reports only to you, the client. This allows a totally transparent relationship and effective reporting. No cover ups, no collusion, just honest feedback and advice.

### Knowledge & Reputation

With more than 10 years of experience, Verifier combines tailored monitoring solutions with proven results. Verifier's intellectual property is a major competitive advantage and differentiating factor. Verifier provides security for some of the most recognised names, globally.

### Monitoring Platform

We utilise one of the most advanced Central Station Software packages available. The developers are committed to meeting the world's most stringent requirements for Monitoring Stations including ASIAL Grade 1, UK Standards and UL certification.

### Control Centres & National Footprint

Verifier owns and manages two control centres, one in Johannesburg and the other in Cape Town. This configuration allows the potential automation of fail-over and load balancing protocols. This has shown to be crucial in a country fraught with aging infrastructure, and a potentially unstable power supply,

### Community

Verifier has significant community monitoring experience, tried and tested over several years. We have developed an excellent and nuanced appreciation of what works and what doesn't, all while growing and nurturing our network of contacts along the way.

### Technology

Our understanding of the hi-tech analytics arena, AI (artificial intelligence), LPR (licence Plate Recognition) and general CCTV is unsurpassed in the industry. We continue to work to stay informed and engaged with the latest technology. We have significant experience in human detection technologies (Analytics), be it device, cloud or edge based - utilising their respective strengths and mitigating their respective shortcomings.

### Our People

Verifier has a highly experienced management, supported by a skilled in-house technical support team. With our ongoing controller training and extensive recruitment and evaluation procedures, the people at the core of our business helps place Verifier in a class of its own.
