

Smart Estate & Business Park Monitoring

Smart Detection, Crime Prevention, Drop Your Guard

**Tried and Tested
Real Peace of Mind**

Tried and Tested. Real Peace of Mind.

Management of a business park or residential estate is a 24/7 job.

With constant guard shift changes, access control issues, and having to contend with the sheer volume of people coming and going, it's a sure-fire security challenge.

Verifier's Smart Estate & Business Park Monitoring solution provides high-end A.I driven perimeter CCTV monitoring, advanced LPR systems, and cost-effective early warning preventative detection, while allowing for minimal on-site guarding.

For families, peace of mind and protection is of utmost importance, and for business park managers, keeping assets secured, and providing a sheltered working environment for long-term tenants is key. Prevention and effective monitoring should therefore be the first line of defence.

Our audio-challenge enabled systems combined with regular video check-ins with on-site guards for SOP compliance further enhances the service. Regular audits and reporting further assist estate security managers with troubleshooting and planning.

Client-specific system

Physical Security Information Management (PSIM) Systems are tailor made to match your requirements and budget.

Enhanced Perimeter Monitoring

Our A.I driven 'virtual boundary' detection establishes a visual early-warning intruder detection perimeter. Our system can be applied to Infra Red and Thermal cameras, to new and existing cameras (upon assessment),

Streamlined Access Control

Through the use of LPR systems, Facial recognition and Video Analytics, we are able to fortify and effectively heighten your access control capabilities.
