

# Smart Commercial & Industrial Monitoring

Smart Detection, Crime Prevention, Physical Security  
Information Management (PSIM)

**Tried and Tested  
Real Peace of Mind**

# Tried and Tested. Real Peace of Mind.

How can you best secure the assets within your building whilst also protecting the building itself?

Verifier's Commercial Monitoring solution addresses the need for perimeter monitoring, access management, fire and alarm monitoring. Our access point monitoring as well as gate monitoring solutions can be readily integrated into existing security systems (once assessed), allowing the full utilization of the technology at hand.

Theft and vandalism is prevented by utilising the latest in LPR and CCTV technology, incorporating A.I powered Video Analytics as well as Thermal and Infrared camera technology.

Through innovations in IOT (Internet of things) and A.I, systems can be integrated and calibrated to learn over time and ease in reporting and troubleshooting. This serves to provide effective and efficient data about your premises.

## Client-specific System

Physical Security  
Information Management (PSIM)  
Systems are tailor made to match your requirements and budget.

## Enhanced Perimeter Monitoring

Our A.I driven 'virtual boundary' detection establishes a visual early-warning intruder detection perimeter. Our system can be applied to Infra Red and Thermal cameras, to new and existing cameras (upon assessment),

## Streamlined Access Control

Through the use of LPR systems, Facial recognition and Video Analytics, we are able to fortify and effectively heighten your access control capabilities.
